

BIO 4AE3. 3 Oct

- HIV dynamics
- salmonella (intracellular)
- bacterial parasites of Drosophila.

Immune responses ($\frac{dz}{dt} = kV - \gamma z$)
cytotoxic T-lymphocytes
logistic growth of host cells

$$\frac{dz}{dt} = \frac{kV - \gamma z}{\text{produced in response virus}}$$

Salmonella

- is there heterogeneity among cells?
- NOT necessarily
stochastic model
